<h3>Static Cling Stickers &amp; Highly Removable Stickers for cars</h3> <p><b>Full color ultra removable decals</b> are easily removable from virtually any surface. Printed for outside the car window glass.</p> <p><b>Single Color</b> removable adhesive stickers are printed on white background -a fast and economical product with a classic look!</p> <p><b>Static cling stickers</b> are generally for inside car windows and on other glass surfaces. (static cling stickers are like the "oil change stickers" used at service centers)</p> 	<h3>Highly Removable Stickers</h3> <p>Ultra decals are better than stickers because they are removable</p>  <p>glass      painted wall      painted bumper      wood</p>
---	--

Seems easy right? Just print stickers!

You need some planning however, for where they will end up. We will print any color and put static or highly removable adhesive on the front or back of the sticker - there are considerations...

## Inside or Outside the window?

**Static Cling or Highly removable adhesive? Both cost the same - why not stay safe?**

The most common request is for static clings. Most folks feel safe using them and may have a bad experience with some sort of permanent adhesive sticker years ago. The adhesive used for highly removable stickers today is designed to be *very easily* removed. It's much like the adhesive used on the clear protective surface you get on a new cell phone. You may start thinking this will take forever and then it peels right off.

Most folks start wanting static cling since they feel comfortable with clings since they are commonly used on their windshield for oil change stickers

Clings with darker colors - inside the window won't show well when used in tinted windows.

Highly removable adhesive on same sticker - outside the window.

## Dark Colors will not show through a tinted window

Even Collegiate Style stickers are now being placed outside windows - they stay put and are conditioned to weather well

Dark colors placed inside any tinted window will not show through

These stickers sit outside the window and use highly removable adhesive backing - our biggest seller

## Clear or White - Background color?

Clear background stickers can reflect a different color - its best to use a colored background for appearance

the square around the cowboy is visible in bright sun

This sticker looks great on the window, car surface or even stuck to a locker!
